

TOOWOOMBA Development Status Report 2026

**TOOWOOMBA
REGION**

Rich traditions. Bold ambitions.

TOOWOOMBA DEVELOPMENT STATUS REPORT 2026

Jo Sheppard
CEO
Toowoomba
and Surat Basin
Enterprise

The Toowoomba Development Status Report 2026 highlights the strength, confidence and opportunity that continue to define our region. As Queensland's largest inland city, Toowoomba is experiencing significant investment across housing, health, education, manufacturing – including in agriculture, energy, infrastructure and commercial development.

Toowoomba's key point of difference as an investment destination lies in its unique combination of economic diversity, exceptional liveability and strategic location, creating a resilient economy and an attractive environment for businesses, investors and residents alike.

This year's report demonstrates the scale of activity underway, with billions of dollars in completed, current and proposed projects shaping the future of our region. From major health and education investments to expanding renewable energy developments, advanced manufacturing facilities and growing residential communities, Toowoomba continues to attract investment that supports jobs, productivity and long-term economic growth.

The Development Status Report plays an important role in providing businesses, investors and stakeholders with a clear picture of development activity, helping to inform decision-making and build confidence in the opportunities that exist across Toowoomba and the wider Darling Downs.

I thank the many project proponents, industry partners and government agencies who have contributed to the continued growth of our region. Together, we are building a prosperous future that supports investment, creates employment opportunities and enhances the liveability of our communities for generations to come.

Cr Geoff McDonald
Toowoomba Region
Mayor

The Toowoomba Region is where ambition meets opportunity, from our vibrant inner-city precincts and distinctive neighbourhoods to our network of surrounding towns, all contributing to the character, strength and liveability of our Region.

Built on strong foundations and guided by a clear vision for the future, Toowoomba is entering a new era of growth. We are positioning ourselves as one of the most dynamic, diverse and forward-looking regional economies in Queensland and across Australia.

This 2026 Toowoomba and Surat Basin Enterprise Development Status Report highlights the scale and momentum of investment across both the private and public sectors, a clear vote of confidence in our Region and its future.

Toowoomba remains one of Australia's most productive agricultural regions, with strong output across cereals, beef, pork and poultry, supported by an expanding food and value-added processing sector.

At the same time, our city continues to strengthen its role as a major service centre, with significant employment across health, education, defence, business services, construction and retail.

Importantly, our economic base is evolving. Growth in advanced manufacturing, transport and logistics, and information and communications technology is creating new opportunities for local industry and strengthening supply chains across southern Queensland.

Our strategic location and enabling infrastructure continues to attract investment from firms supporting mining operations and renewable energy projects across the Surat Basin, reinforcing Toowoomba's role as a critical regional hub.

At Toowoomba Regional Council, we see our role as enabling this momentum, creating the conditions for business to invest, innovate and grow.

By modernising our systems, strengthening our culture and working closely with industry, we are building a more productive, prosperous and entrepreneurial Region.

Toowoomba's reputation for steady, reliable growth continues to make it an attractive destination for investment, industry and job creation.

This report reflects that confidence and the scale of opportunity ahead.

I am confident the developments outlined in this report will deliver lasting benefits for our communities, supporting jobs, strengthening local industries and enhancing the liveability of our Region for current and future generations.

SUMMARY

The Development Status Report is updated biennially to provide businesses with a comprehensive overview of significant developments across the Toowoomba region, including project values, locations and estimated completion dates. By maintaining this record, TSBE aims to support informed business decision-making, strengthen investor confidence and encourage further investment across the region.

The 2026 report showcases the significant investment delivered throughout the region over the past two years while highlighting major projects in the development pipeline. The report includes known developments with a value exceeding \$1 million, offering valuable insights into the region's continued growth and economic development.

Total projects

\$21.8+ billion

Civil works

\$815 million

Energy

\$10,250 million

Manufacturing

\$1,949 million

Housing

\$4,200 million

Health

\$2,617 million

Commercial

\$417 million

Roads

\$320 million

Infrastructure

\$941 million

Education

\$298 million

Figures include projects that are underway, approved, proposed, planned and prospective.
