

Transforming Agriculture IN REAL TIME

Tour the Darling Downs and explore the cutting edge of agrifood Innovation

TOUR PROGRAM

Join us in the Darling Downs Region and see the cutting edge of agrifood Innovation on a tour facilitated by Toowoomba and Surat Basin Enterprise and supported by SQNNSW Innovation Hub. Exploring real-time advances in robotics, automation, and tech-driven innovation, driving business efficiency, drought resilience, and sustainability - where technology meets tradition to find Common Ground in the future of food and farming.”

Join us for exclusive sideline experience as part of evokeAG. These immersive site visits will showcase Australia’s leading-edge capabilities across key sectors shaping the future of food and agriculture.

WHAT TO EXPECT

- **AgTech and Robotics:** See automation and robotics in action, solving real-world challenges with precision and efficiency.
- **Sustainable Farming:** Discover innovations in waste transformation, biochar production, and sustainable farming practices that are driving environmental progress.
- **High-Tech Solutions:** Explore advanced data systems, high-performance equipment, and cutting-edge research facilities pushing the boundaries of productivity and resilience.
- **Horticulture and Processing:** Witness world-class seedling production, vegetable processing, and innovative supply chain solutions tailored for scalability and quality.

These experiences offer a unique opportunity to connect with industry leaders, see pioneering technologies in action, and be inspired by the bold ideas shaping the future of agrifood systems.

STEP INTO THE FUTURE. BE INSPIRED. BE PART OF THE CHANGE.

**PLEASE NOTE LOCATIONS AND TIMES ARE SUBJECT TO
ONGOING CHANGE AT TSBE’S DISCRETION**

TOUR PROGRAM | THURSDAY 20th February 2025

8am **BUS DEPARTS BRISBANE**

10:30am **STORY FRESH**
***Purpose:** Story Fresh leverages decades of expertise in farming and vegetable processing to deliver safe, fresh, and high-quality produce, utilizing advanced food safety systems and sustainable practices to minimize environmental impact.*

12pm **TOSARI R&D**
***Purpose:** Tosari Crop Research Centre uses advanced research, training, and demonstration facilities to foster innovation and resilience in the Australian grains industry, enabling efficient adoption of AgTech and modern farming solutions.*

2pm **BOOMAROO**
***Purpose:** Boomaroo Nurseries leverages automation and innovation to supply Australia's fresh produce industry with high-quality, commercially viable vegetable seedlings, supporting efficient and scalable agricultural production.*

6pm **INDUSTRY DINNER**

RDO EQUIPMENT

8.30am

Purpose: RDO Equipment Australia is a leading provider of high-tech agricultural and construction machinery, delivering innovation-driven solutions and services to support industry efficiency, productivity, and sustainability.

PULSE DATA CENTRE

10am

Purpose: Pulse Data Centre drives innovation by offering high-performance, scalable, and sustainable data centre solutions, utilizing advanced connectivity, security, and operational management systems to support businesses' evolving IT infrastructure needs.

SWARM FARMS

11.30am

Purpose: SwarmFarm Robotics revolutionizes agriculture by providing automated, robotic solutions tailored to address local farming challenges, enhancing sustainability, efficiency, and precision through integrated autonomy.

PYROCAL

1pm

Purpose: Pyrocal utilizes innovative continuous carbonization technology to transform agricultural, forestry, and biosolid waste into biochar and energy, supporting sustainability, waste reduction, and carbon offset goals.

2.30pm

BUS DEPARTS FOR BRISBANE AIRPORT
